**DETAILED ACTION**

***Amendment***

1. Receipt is acknowledged of the amendment and drawing correction filed 30 November 2005.

***Allowable Subject Matter***

2. Claims 1-11 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of record fails to specifically teach the interactions within the circuit, mainly, that the comparison-voltage generating means are implemented separately from the evaluation means and further, that the evaluation means are arranged to receive the comparison voltage from the comparison-voltage generating means. Hence the best prior art of record fails to teach the invention as set forth in claims 1-11 and the examiner can find no teaching of the specific data carrier, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 30 November 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Art Unit: 2876

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 6,294,997 to Paratore et al. which teaches an RFID tag having timing and environment modules, U.S. Patent No. 6,147,825 to Alini et al. which teaches a timer with temperature compensation of time delays, U.S. Patent No. 5,973,975 to Raad which teaches a method and circuit for sharing sense amplifier drivers, and U.S. Patent No. 4,847,725 to Ishii which teaches a circuit breaker.
